

**Project name**

Portland Sewer project 5501

**Location**

Portland, Oregon

**Completion date**

June 2006

**End user / Owner**

City of Portland Environmental Services

**Engineer**

City of Portland

**Description**

Supply of 1200 feet of 48" Fiberstrong™ FRP sewer pipe and fittings with standard Reka coupling joints.

**Advantages / unique project features**

A Corrosion resistant, inert pipe system with water-tight joints that easily passed the city's leakage allowances. Majority of pipe was installed inside a highway tunnel, under the roadway under a tight project schedule to minimize tunnel closure during construction.
