Glassfiber Reinforced Pipe Systems

**Sea water, cooling water, fire water, potable water, chemical lines
Ruwais, U.A.E.**

Location
Ruwais, U.A.E.

Date
1998-present (2000)

End User
Abu Dhabi National Oil
Company
(ADNOC)

Contractor
Snamprogetti

Description

For the Ruwais oil refinery expansion project, as this project is called, several lines have been supplied. The original refinery was already equipped with pipes from Future Pipe Industries and for this expansion again FPI was chosen. All the materials have been prefabricated locally through a spool shop operated under FPI supervision. Through the engineering branch of FPI, Dynaflo International the engineering scope is performed.

Scope

Our scope included:

- Engineering
- Fabrication
- Installation
- Supervision

Pipe System

From 25mm up to 1200mm, several glassfiber reinforced epoxy and vinylester lines have been supplied. Pressures range from 12 up to 25 bar. Total project value is approximately USD 13,000,000

Advantages

The complete package supplied by FPI was a major advantage for this project. This package includes:

- The engineering through Dynaflo International
- Local prefabrication through workshop on site
- Installation of the GRE/GRV pipe systems
