HSE – Health, Safety and Environment

Policy Statement

Future Pipe Group is dedicated to controlling and minimizing all health, safety and environmental risks associated with its activities and processes. Therefore FPI has adopted HSE as a key strategic business function for employee well-being, sustainable growth, profitability and corporate responsibility.

More specifically FPI Group is committed to achieve the following HSE objectives:

- Engage management and shop floor employees in matters affecting their health, safety and well-being as well as their work environment.
- Provide and maintain safe machines, tools and equipment whilst minimizing adverse environment effects.
- Ongoing assessment and control risks of work activities and the working environment
- Achieve zero incidents and injuries as a long term objective
- Actively involve all employees with the continuous improvement of health and safety and minimization of using materials, energy and water resources.
- Adopt and train employees in world class excellence tools to integrate health and safety into the operational processes of the company.
- Engage local authorities with continuous improvement of HSE standards and regulations.
