

PROJECT

Karachi Industrial Area Sewerage GRP Pipeline

LOCATION

Karachi, Pakistan

PRODUCT

FIBERSTRONG®

CONTRACTOR

Ayub Brothers

END USER

Karachi Sewerage & Water Board (KW&SB)

DIAMETER RANGE (MM)

200 - 1200

DESIGN PRESSURE

10 Barg

MARKET SEGMENT

Municipal/Infrastructure

APPLICATION

Sewer Lines

COMPLETION DATE

2007

DESCRIPTION

FPI supplied the pipes and associated materials to the installation contractors and supervised the project in a number of locations where the pipe system was being installed. The system is based on gravity flow so it was essential to keep an eye on the accuracy of the installation.

THE FPI ADVANTAGE

This was the first introduction of FIBERSTRONG® GRP pipes in Pakistan after FPI has been actively selling and driving conversion to fiberglass pipe systems in the market since 2005. Today, GRP has been accepted in Pakistan as a superior material and end users in Pakistan have now introduced GRP pipes in their tender specifications.
